SUMMARY

Frontend & Mobile Software Engineer with 3+ years of experience building and shipping production web and mobile applications using React, React Native, Expo, Flutter, and Next.js.

Proven ownership of features end-to-end, from UI implementation and API integration to App Store and Google Play release management. Strong background in TypeScript, modern state management (Zustand, TanStack Query, Flutter BLoC), and Firebase-based backends, with a focus on building scalable, maintainable, and user-centered products.

EXPERIENCE

Frontend Engineer | [Orbit Tech Solutions](#)

Aug 2024 - Jul 2025 · 1 yr

- Led development of production web and mobile applications, translating product requirements into scalable, maintainable frontend architecture.
- Architected and implemented complex UI flows using Next.js, React, React Native, TypeScript, Zustand, and TanStack Query, ensuring performance and state consistency across platforms.
- Owned the entire mobile release lifecycle (build, signing, CI/CD, store submission, and release management).
- Acted as a key frontend counterpart to backend and product teams, proactively shaping API contracts and refining feature scope to meet business goals.
- Delivered multiple MVP and feature iterations under tight timelines, contributing directly to successful client demos and positive stakeholder feedback.

Frontend Developer (Freelance) | [Rotasi Galaksi Teknologi \(Rogatekno\)](#)

Apr 2023 - Present · 2 years 9 months

- Designed and delivered end-to-end mobile solutions from initial requirements through production release across multiple client projects.
- Built scalable mobile applications using React Native (TypeScript, Zustand, TanStack Query, Firebase) and Flutter with BLoC architecture, emphasizing clean separation of concerns and long-term maintainability.
- Implemented robust state management patterns to support complex user flows and evolving business requirements.
- Managed Entire deployments, including versioning, release preparation, and review coordination to ensure on-time delivery.
- Worked directly with clients and internal teams to clarify requirements, reduce iteration cycles, and deliver high-impact, production-ready features.

TECHNICAL SKILLS

- **Web Development:** React.js, Next.js, HTML, CSS, Tailwind
 - **Mobile Development:** React Native, Expo, Flutter, BLoC, iOS & Android App Publishing, Zustand, TanStack Query, Flutter BLoC
 - **Backend Development :** Node.js, Firebase (Functions, Firestore, Realtime Database), PostgreSQL
 - **Third-Party Integrations :** REST APIs, Firebase Auth & Push Notifications, Apple In-App Purchase, Google In-App Purchase, Midtrans, Shufti Pro (KYC / OCR), Zoho (Document Signing), Web3Auth, Ethers.js, Google Maps 3D API
 - **Development Practices:** Agile / Scrum, Git-based Version Control, Code Reviews, Unit & Integration Testing, Mobile Security Basics, Responsive & Mobile-First Design, User-Centered Design
-

EDUCATION

Pijar Camp by Telkom Indonesia — Full Stack Web & Mobile Developer

Aug 2023 - Dec 2023 · 4 mos

- Completed an intensive full-stack bootcamp focused on modern web and mobile application development.
- Built production-style web and mobile applications using JavaScript, Express.js, React.js, React Native, Next.js, HTML, and CSS.
- Applied industry-standard development practices, including clean code, collaboration workflows, and deadline-driven delivery.
- Developed professional skills in communication, presentation, personal branding, and time management.
- Delivered multiple projects, including Mama Recipe (Web & Mobile), Blanja (Team Web App), and Peworld (Web App).

MA Sabilurrosyad Ciamis — Science

Jul 2020 - May 2023 · 3 yrs

- Completed high school education with a focus on science and analytical thinking.
 - Built a strong foundation in mathematics, logic, and problem-solving, supporting further growth in software development.
 - Developed discipline and teamwork through academic and extracurricular activities.
-

LANGUAGES

- Indonesian — Native
- English — Professional working proficiency

PROJECTS

Fun Music Software

Rotasi Galaksi Teknologi (Rogatekno)

- Developed Fun Violin and Fun Drums, two production music learning mobile applications released on Google Play Store and Apple App Store.
 - Built interactive play-along learning experiences for violin and drums, supporting both classroom and self-practice use.
 - Implemented structured lesson content with 2,000+ high-quality play-along tracks across multiple genres and tempos.
 - Designed a subscription-based content system unlocking additional lessons and 300+ multi-tempo tracks.
 - Optimized audio playback for consistent, high-quality output across devices, including Bluetooth and external speakers.
-

Fastech Internal Employee App

Rotasi Galaksi Teknologi (Rogatekno)

- Led development of a **mission-critical internal mobile application** used by employees for daily operations and reporting.
 - Architected the app using **Flutter with BLoC** to ensure scalable, maintainable state management.
 - Implemented **GPS-based attendance** for accurate check-in/check-out and misuse prevention.
 - Built **leave request workflows**, daily activity logging, and real-time reporting to improve transparency and productivity.
 - Integrated **instant approval notifications** for supervisors and administrators.
 - Delivered and maintained a **private production app** on both **Android and iOS**.
-

Kokara (formerly VISI8)

Rotasi Galaksi Teknologi (Rogatekno)

- Contributed to a **digital comic platform** supporting Indonesian creators and local content discovery.
- Built core mobile features using **React Native, Zustand, and Firestore** for predictable state management and real-time updates.
- Developed reading, discovery, and follow features to deliver a smooth, mobile-first reading experience.
- Helped establish a dedicated distribution channel for local creators, strengthening the digital comic ecosystem.

Karpous Mobile App

Orbit Tech Solutions

- Developed core mobile features for a **Global RWA Exchange**, enabling users to access and trade fractionalized real-world assets.
 - Implemented secure **USDT deposit and withdrawal flows** using **Ether.js**.
 - Integrated **KYC and compliance workflows** via **Shufti Pro (OCR & identity verification)** and **Zoho (digital signing)**.
 - Added **real-time push notifications** using Firebase to support transaction and account updates.
-

Fairway (Web)

Orbit Tech Solutions

- Built an MVP web application visualizing **real-time golf ball tracking** on an immersive 3D map.
- Integrated **Google Photorealistic 3D Maps API (beta)** to deliver high-fidelity, realistic course visualizations.
- Successfully delivered the first production phase, receiving **positive client feedback** and validating the product concept.
